VEHICLE INSPECTION

At Vehicle turn-in, We may schedule an inspection to confirm the Vehicle condition and mileage. All inspections are performed by trained evaluators under consistent lighting conditions. Damage is measured with straight-line tools. Any repair costs are based on standard market rates. You will receive a written report with photos if charges apply. We may use third-party vendors for inspection and repair cost validation. We reserve the right to determine whether a condition constitutes excess wear based on this guide, photographic evidence, and standard market repair methods. Unlisted conditions may also reduce the Benefit Amount if they diminish the Vehicleís resale value.

All assessments are final unless corrected within the customer dispute window (5 business days from receipt of the inspection report). If damage
